THIS FRIDAY, MAY 7, 2010 IS MARIN CLEAN ENERGY'S HISTORIC POWER ON! DAY.

MCE is California's first operating community choice energy program. It will serve residents and businesses in Mill Valley, San Rafael, Fairfax, Tiburon, Sausalito, San Anselmo, Belvedere and unincorporated areas of Marin County.

If your home or business is in one of those areas, please join me in fighting global warming by signing up for DEEP GREEN.

Why DEEP GREEN? So many Marin residents want to protect our environment and address climate change! Deep Green provides 100% clean, renewable electric power and helps sideline energy production from dirty and dangerous fossil fuels.

Increasing our proportion of renewable energy and reducing our overall energy use are critical actions against global warming. Deep Green helps Marin do both. In addition to serving certified renewable power, Marin Clean Energy revenues go to develop and support energy efficiency programs and our local green economy.

If you don't know if you are eligible for Deep Green, call (888) 632-3674. Our phone reps can answer questions or sign you up.

Our community is going green together. Start making a difference TODAY for non-polluting local power, a vibrant local economy, and climate protection.

**Start here: Marin Clean Energy.

SOME DETAILS

Deep Green costs a penny per kilowatt hour (KwH) more than your current rates. For most households this means about \$5-\$10 more per month. Call (888) 632-3674 to find out what Deep Green would cost on your bill.

For Phase 2 customers, a Deep Green enrollment fee of \$10 per month will apply only until Phase 2 rolls out next spring, plus 1¢ per KwH.

Call (888) 632-3674 to find out if you are in Phase 2, or if you have other questions.
